CARR PRINTING CO.
Bountiful, Utah

WE ARE STRIVING . . .

To grow the BEST nursery stock that is possible to grow . . .

To serve our patrons in a courteous, intelligent manner and give them full value for the money they pay . . .

To conduct our business in a business-like manner, doing every reasonable thing to insure satisfaction to our customers . . . We need their good-will more than their money.

We respectfully solicit your inquiries concerning anything pertaining to horticulture. Forty-five years of experience in the nursery game has given us a rather broad conception of kinds and varieties best adapted to our altitude and climate.

The quotations and conditions in this catalog and price list are in effect so long as stock on hand is unsold.

All orders will read cash on delivery. Cash or satisfied reference from all parties unknown to us. Free delivery to all local points, Salt Lake City and Ogden. We do not pay freight nor express unless otherwise agreed.

All stock leaving our packing grounds will be selected and packed in the best possible condition. So many factors enter into the success or failure of nursery stock after moving from under our care that we cannot assume losses through causes over which we have no control. **We do not replace.** Any just claim for error or damaged stock will receive our strict attention. Satisfaction guaranteed.

SMITH BROTHERS' NURSERIES

ORNAMENTAL SHRUBS

The following list of ornamental shrubs comprise those varieties best known to us after years of observation and experience. Our desire is to furnish to the planter the greatest amount of satisfaction in the matter of hardiness, beauty of flower and foliage, giving a pleasing variation of color during the entire season. This may be brought about through an intelligent selection and a proper placing of the plants. Nothing will produce a home-like appearance quicker than to cover rough foundations and walls, outbuildings and back yards with a mass planting of trees and select shrubbery, climbing vines, etc., etc.

Low growing shrubs will be designated with the check x; high xx. This checking will enable the planter to place the plant in the proper position in the group. Wherever space will admit two rows of shrubs should be planted, the high growing plant always in the rear, the low growing kinds planted in the foreground in a staggered form. In planting do not put manure or fertilizer of any kind in the hole with the roots—this will apply to all plantings.

The following shrubs furnished at 75 cents each; 10 for \$5.00:

- xx **Spirea Vanhoutte** (Bridalwreath)—Grandest of all Spirea. When in flower is a complete fountain of white bloom, with its leaves hardly showing. Its graceful, drooping habit and delicate foliage commanding attention when not in bloom.
- xx **Spirea Sorbifolia**—Upright shrub of medium height with large, bright green, compound leaves and large, showy panicles of flowers in mid-summer.
- xx **Opulifolia Aurea** (Gold Leaf Ninebark)—Golden leaved variety.
- xx **Sorbaria, False-spirea**—Long graceful foliage. Creamy white flowers, June-August.
- xx **Bloodtwig Dogwood**—Beautiful glossy red branches, greenish-white flowers, May-June.
- xx **Weigela Eva Rathke**—The most distinct and one of the most attractive varieties of Weigela. Flowers deep carmine-red, very profuse, and blooms a large part of the summer.
- xx **Common Purple Lilac**—Light purple, single flowers, April-May.
- xx **Common White Lilac**—White single flowers. Otherwise same as above.
- xx **Snowball**—Well-known shrub with large globular clusters of pure white flowers. Tall growing.
- xx **Almond, Double Flowering**—A beautiful shrub, covered with a mass of rose-colored bloom in early spring before the leaves appear. Also with pure white bloom.

"By Their Fruits Ye Shall Know Them"

SMITH BROTHERS' NURSERIES

ORNAMENTAL SHRUBS (Continued)

- xx **Persian Lilac**—Spreading habit. Slender arching branches with small leaves.
- xx **Japan Quince (Firebush)**—Low growing shrub with large masses of scarlet flowers in May, followed by small, quince-like fruits which are quite fragrant.
- xx **Forsythia (Golden Bell)**—Tall shrub with dark green, lustrous leaves and bright, golden bloom in the spring.
- xx **Dentatum, Arrowwood**—Attractive foliage, bushy growth, single white flowers.
- xx **Cut Leaved Sumac**—Should be in all collections because of its beautiful foliage especially in the fall.
- xx **Smooth Sumac**—A handsome, tall growing shrub of wonderful carmine colored foliage in the fall.
- xx **Golden American Elder**—Where a bright variation of color is desired nothing surpasses this yellow-leaved shrub.
- xx **Sorbifolia Spirea**—A very handsome upright growing shrub with large bright green leaves.
- xx **Prunis Passardi**—Planted extensively for its reddish foliage.
- xx **Cotoneaster (Peking Cotoneaster)**—Very hardy. Dark green leaves. Black fruit.
- xx **Caragana (Siberian Pea Tree)**—Arborescens. Fine foliage, yellow pea-shaped flowers.
- xx **Butterfly Bush**—An all-season bloomer. An old favorite.
- x **Spirea Frobella**—Rose colored flowers in flat clusters most of the summer season. Compact bush of medium height; tips of leaves reddish purple, turning to mahogany color in autumn.
- x **Spirea Anthony Waterer**—A red flowering variety; bushy, dwarf habit and variegated foliage. Flowers from July until late fall. Rarely attains a height of more than two feet.
- x **Spirea Callosa Alba**—Dwarf in habit, becoming 18 to 24 inches high. Flowers pure white, in flat topped clusters; profuse bloomer throughout the summer. A good companion plant for the Anthony Waterer.
- x **Coral Berry (Indian Currant)**—Small pink flowers, followed by tiny red berries in clusters along the stems. Suitable for partially shaded locations. Sometimes called Red Snowberry.
- x **Barberry, Japanese Red**—Similar to the above except that the foliage is of lustrous, bronzy red throughout the summer, changing to vivid scarlet in the fall. To develop its brilliant coloring at all seasons it must be planted in full exposure to the sun. Very desirable for its pleasing contrast to the green foliage of other shrubs.

"By Their Fruits Ye Shall Know Them"

SMITH BROTHERS' NURSERIES

ORNAMENTAL SHRUBS (Continued)

- x **Privet, Regel**—Low spreading branches; flowers white. Foliage colors nicely in autumn. Fine as a single specimen or when used for hedge.
- x **Barberry, Japanese**—A pretty species of low growing shrub with small leaves, coloring superbly in fall. Creamy-white flowers, followed by red oval fruits in fall. A general favorite.
- x **Spirea Thunbergi**—Japanese variety of medium size; feathery, light green foliage and a profusion of small white flowers in early summer.

CLIMBING VINES

- Boston Ivy**—Clings to the wall.
- Virginia Creeper (Engelmann)**—Clings to the wall.
- Virginia Creeper (Common)**—Best creeper grown for covering surface quickly.
- Halls Japan Honeysuckle**—A heavy dark green foliage, nearly evergreen.

PRIVET HEDGE

6 cents each, \$5.00 per 100
(Plant 6 inches apart)

- Hibiscus**—Perennial. Crimson, pink, red — One of the most striking late bloomers....50 cents each
- Tritoma**— Perennial. This is the genuine Red Hot Poker. 50 cents each.

ROSES

The following list of Roses, while limited in number, is made up of some of the finest varieties known to rose culture, it being our aim to handle only those kinds and varieties which possess both beauty and stability. 75 cents each; \$5.00 for 10.

Etoile de Hollande—The finest dark rose for general purposes. Its gigantic flowers are velvety crimson and are produced with great freedom throughout the season. This is unquestionably the best and most popular red Hybrid Tea Rose in the world.

Independence Day—Spreading, bushy plants. Brownish orange buds, opening to large, semi-double, vivid apricot-yellow flowers. A bed of it always makes a glorious display of color.

Padre—Pernetiana. A wonderful new rose. Erect in habit, very free blooming. Colors coppery orange crimson with shadings of yellow at the base of the petals. Beautiful in the bud or the the expanded flower.

Souvenir de Claudius Pernet—Pernetiana. A rose of lovely sunflower-yellow, deepening in the center. The buds are produced on long, stiff stems which make them excellent for cutting. Foliage a brilliant green.

Frau Karl Druschki—Hybrid Perpetual. Flowers large, of good shape and pure white in color; growth strong and vigorous with abundant foliage.

"By Their Fruits Ye Shall Know Them"

SMITH BROTHERS' NURSERIES

ROSES (Continued)

- Dame Edith Helen**—Hybrid Tea. A rich glowing that does not fade. Flowers carried on upright stems, large, full and very fragrant. The best of the newer roses.
- Red Radiance**—Hybrid Tea. A glowing crimson sport of Radiance. Has all of the good qualities of the parent.
- Radiance**—Hybrid Tea. Brilliant, rosy opaline-pink. Large, free, and of beautiful form, with sweet fragrance.
- Mme. Edouard Herriott**—Pernetiana. Coral-red, shaded with yellow and bright rosy scarlet. Strong grower, with bright glossy green foliage.
- Los Angeles**—Hybrid Tea. A vigorous growing rose that produces long-stemmed flowers. Luminous flame-pink, toned with coral and shaded with gold at the base of the petals. Excellent in bud or full flower.
- Crimson Queen**—H. T. Rich, bright, velvety crimson; large and full flowers; strong upright grower; beautiful broad foliage. Very much superior to the old rose Gruss an Teplitz.
- Gruss an Teplitz**—Brilliant deep red with velvety crimson.
- Paul's Scarlet Climber**—A strong climbing rose with an intense flame scarlet bloom that will not fade. Flowers semi-double and remain in good condition for a long time.
- American Pillar**—Rich, rosy pink, with a glint of white at center and golden-yellow stamens. Large and single.

EVERGREEN TREES AND SHRUBS

It is generally believed that Evergreen trees and shrubs are hard to transplant, this is not true, if a proper method of digging and balling at the proper season is followed nothing should be more successful. The following list comprises some of the finest varieties adapted to our climate. Evergreens are now being used extensively in mass and foundation plantings. Our line this season is so varied in kind, character and size that we are unable to quote prices here. Kindly see us or write us concerning this, we have a beautiful stock to offer you.

- T. Orientalis**—"Berckman's Dwarf Ever-golden Arborvitae." Of dwarf habit, compact and symmetrical, almost globular as it gets older. All the branchlets are tipped with a bright golden tint, which is held all through the year. Can be used as a porch plant in tubs for a limited time and then planted out. Make excellent lawn specimens. This is possibly the most popular variety in our entire list of Conifers.
- Arbor Vitae, American**—Native northern evergreen. Tall spreading grower. Flat foliage.

"By Their Fruits Ye Shall Know Them"

SMITH BROTHERS' NURSERIES

EVERGREEN TREES AND SHRUBS (Continued)

T. Pyramidalis— Of upright narrow columnar habit, with dense foliage, bright green at all times during the year. A valuable and effective tall-growing evergreen for formal effect.

Thuja beverleyensis— "Golden Column Arborvitae." The tallest and stateliest of the Chinese Arborvitae, growing into a narrow column of golden green foliage, and particularly effective for specimen planting or for pairing on either side of a doorway.

T. orientalis—"Chinese Arborvitae." A medium-sized conifer with bright olive green foliage forming a dense broad pyramid.

Chinesis (Chinese Juniper)—Compact, dense, silvery-gray, short needle-like foliage.

Silver Juniper—Native.

Pfitzeriana (Spreading Juniper)—A prostrate type. Develops a large number of long, slender, tapering shoots clothed with a fine green foliage. One of the best.

J. communis depressa—"Prostrate Juniper." Handsome low growing Juniper, rarely exceeding 3 feet in height, but attaining a spread of 12 to 15 feet. Dense, silvery, bluish-green foliage.

Juniperus virginiana (Redcedar)—This tree hardly needs a description, as it is one of our oldest, most popular and best-known evergreens. However, there is a wide variation.

Pyracantha (Evergreen Hawthorne--Burning Bush)—Formerly grouped with Crataegus. Evergreen shrubs with glossy foliage and showy berries during the winter season. Somewhat thorny and very hardy.

Pyracantha yunnanensis—A vigorous type, semi-prostrate in form with bright crimson berries. Fine for banks and low planting. A very showy type.

Euonymus alba marginata—This is a variegated type with upright habit of growth. Grows tall and very slender. Leaves whitish-yellow edged with whitish green center.

Mahonia aquifolia (Oregon Grape)—A hardy grower attaining from 3 to 5 feet, yellow flowers in the spring, followed by blue berries resembling grapes. Holly-like leaves borne on upright stems. Does well in sheltered location.

Cotoneaster horizontalis—This variety is almost deciduous, especially in fairly cold localities. Twigs have a habit of coming out at almost right angles to main branch, giving the plant a very trim effect. Leaves are small and almost round, turning very brilliant shades of red just before they drop. Berries are abundant and very brilliant. Low growing.

"By Their Fruits Ye Shall Know Them"

SMITH BROTHERS' NURSERIES

EVERGREEN TREES AND SHRUBS (Continued)

Libocedrus (Incense Cedar)—Native of California and Oregon; tall, compact, conical shaped tree; bright green foliage.

Scotch Pine—A dependable tree for poor soil, where it will thrive in spite of soil conditions. It will also grow equally well in a better location.

DECIDUOUS SHADE AND ORNAMENTAL TREES

To appreciate fully the value of trees and shrubs about the home one has only to contrast the two conditions: a home is not a home until it is planted, it is the best investment possible. See us or write us concerning your future needs. We can help you.

Poplar, Carolina—A very rapid growing tree with large, deep green leaves. Of more spreading habit than other varieties; hardy.

Volga Poplar—Extremely hardy.

Ash, White—Large hardy tree of vigorous growth; broad, shapely head; compound leaves of soft, mellow green.

Maple, Silver—Large, spreading habit; foliage bright green above and silvery underneath. Of most rapid growth among maples.

Locust, Black—Well known, tall, hardy tree with compound foliage and wistaria-like spikes of white, fragrant flowers. Will succeed with less moisture than any other tree.

Locust, Globe—Grafted tree, forming a perfect globe-shaped top without pruning. Of rapid growth and medium size at maturity, making it a very desirable street tree.

Sycamore (Plane Tree)—A large, handsome, symmetrical tree, with bright green leaves often 8 to 10 inches in width.

Maple, Norway—Of compact habit, with broad, deep green leaves. Somewhat slower in growth than others, but conceded by all to be the very best of ornamental shade trees. Has no equal as a street tree.

Maple, Schwedlers—Very similar to Norway Maple except in foliage. Leaves bright red at first, changing to purplish-red and then dark green; making a brilliant contrast with the delicate green of other foliage.

Birch, White Eup.—An attractive lawn tree of upright habit, small slender leaves and white bark.

Birch, Cutleaf Weeping—Tall graceful tree with white bark and slender, drooping branches. A superb lawn tree.

Ash, Mountain—Medium sized tree, with shapely, round top. Covered from early fall to winter with clusters of attractive orange-scarlet berries. Leaves small and compound. A fine lawn tree.

"By Their Fruits Ye Shall Know Them"

SMITH BROTHERS' NURSERIES

DECIDUOUS SHADE AND ORNAMENTAL TREES (Continued)

Willow, Weeping—Well known tree with long, graceful, pendant branches.

Elm, Chinese—Recently introduced from China, this tree finds favor wherever planted. Very hardy and of rapid growth; forming a shapely, compact head with little pruning. Attractive foliage of dark-green, lasting well into autumn. So far as known is not subect to the usual diseases and insect enemies of other elms.

Prunis Pissardi—Purple foliage.

Paul's Scarlet Hawthorn, oxycantha pauli—Produces brilliant double scarlet flowers in June.

THE YUCCA TREE PROTECTOR

At last we have located the very thing we have been looking for—a real tree protector—an inexpensive product. Made from the fiber wood, Yucca, can be placed on the young tree in a moment and will stand the weather, winter and summer for several seasons. It protects your trees (the body) from rabbits, rats and mice, also from peach borers and other insects. It is a protection against hot sun and blistering winds in summer and sun scald in winter. It is being used now in the west and northwest by the millions. We carry a stock of these protectors. Same can be furnished, 18-inch (wired) at 2½ cents each.

This protector should be placed on the tree the day it is planted. Send to us for a sample.

Smith Brothers are also manufacturers of Golden West Marmalade and Smith Brothers' French Sauce. ASK YOUR GROCER
